PROFILE

Software developer with 13 years commercial experience using a variety of tech stacks. My particular strength is front-end development using React/Typescript but I love working with Node and Javascript in general.

SKILLS

- Very strong JavaScript/TypeScript, React, Node, Angular, RXJS, Webpack/Vite, HTML/CSS
- Intermediate level – NextJS, Java, C#.Net, Python, PHP
- Good UX knowledge and strong UI design skills
- Able to lead technical teams
- Clear and concise communicator
- Git expert

EMPLOYMENT HISTORY

Jul '25 - Oct '25 – Hush – Javascript Engineer (contract)

This is my second time consulting at Hush, now as a backend engineer.

Hush are working on a complex migration project, moving away from Salesforce. I was brought in to help them complete this. Using Typescript within a lowcode platform (Buildship), I created and debugged many ETL processes, integrating with numerous external systems via REST/GraphQL.

I was also partly responsible for managing the external team building the UI. Making technical decisions about what data is needed for each screen and helping them construct the queries they need.

Feb '24 - June '25 – ITG/StoryTeq – Lead FE developer (contract)

- Lead 2 React projects to completion
- Extensive work on JLR AEM - created new components and integrations
- Requirements refining and co-ordinating 2 development teams
- Managing deployment pipelines through to production
- Performance optimisation of global JLR websites
- Client demos
- Maintenance work on Java/PHP/NextJS projects

May '23 - Oct'23 – Hush UK – Javascript Engineer (contract)

- Lead redesign project of large e-commerce site
- Working with UX and BA teams to refine designs and requirements
- Created set of components using Storybook/React
- Work on internal chrome extensions

Nov '21 - Apr '23 – Aareon UK – Front-End Developer / Lead (contract)

- Implemented numerous features in complex housing-management application
- Promoted to Lead Developer
- Worked closely with designers and POs to refine requirements

Nov '19 - Nov '21 – Bank of America – Angular / Java developer (contract)

- Upgraded large AngularJS hybrid application to Angular
- Extensive NGRX/Material usage
- C# / Java / SQL

Aug '19 - Nov '19 – The AA – NodeJS Developer (contract)

- Created integration project between AA and third party supplier
- Mentored other developers in NodeJS, React and Typescript

Feb '19 - Aug '19 – Estee Lauder – Full-Stack Developer (contract)

- Created POS system using React and NodeJS

Feb'17 - Feb'19 – Innovation Group – Lead frontend developer (contract)
